PROGRAM

Recent Advances for Severe Emphysema

Wednesday, 26th February 2014
Hampshire Court Hotel, Basingstoke

Sponsorship courtesy of an unrestricted educational grant from Pulmonx
Wednesday, 26th February 2014
17.30 – 19:45

The management of COPD has witnessed a significant change over the past few years. The importance of dividing the disease into several types has therapeutic application. The new many classes of medications introduced or about to be introduced represent a positive thinking into a disease that has been traditionally nihilistically viewed.

Organisation of care that focusses on preventive methods as well as referral and completion of pulmonary rehabilitation remains a challenge.

This course aims at looking into traditional and new modalities of treatment in some depth. It also addresses organisation of care in COPD in the light of national and international audits.

We would be happy to welcome you at our symposium.

Location / Venue: Hampshire Court Hotel, Basingstoke
Centre Drive, Great Binfields Rd, Chineham, Basingstoke, Hampshire RG24 8FY, United Kingdom

Registration Please submit your registration to: events@pulmonx.com
